

Advanced Nutritional Supplement

Monsanto Animal Nutrition

Hy•D®

EVALUATE IT FOR YOURSELF

Research publications comparing the feeding of 25-hydroxyvitamin D₃ to that of vitamin D₃ address its value. But we realize the only way you'll be convinced is by using it yourself. Then we believe you'll agree HytD[®] is a benefit for the poultry industry.

FROM Monsanto

In 1998 Monsanto Corporation acquired IsoGen, LLC. As Monsanto Animal Nutrition, we will continue to be a market-driven company specializing in animal nutrition. Our goal is to create innovative, value-added products that meet or exceed our customers' processing and performance requirements.
